WTS International opens Community Amenity Center for Taylor Woodrow at St. Johns Forest

Rockville, MD — WTS International, Inc. has been selected by Taylor Woodrow Homes to provide daily management and programming services for the newly opened community amenity center at St. Johns Forest in Jacksonville, FL.

St. Johns Forest is a 532 home, gated community surrounded by acres of wetlands and conservation areas, providing an unspoiled impression. With its oak lined streets and warm lighting, the community creates an environment with families in mind. “St. Johns Forest is the perfect setting for those who wish to move to an area that allows easy access to great schools and shopping but also allows them to be surrounded by natured views and beautiful landscaping”, said Jamie Nogueiras, Amenity Director at St. Johns Forest.

The allure is in no small part due to the generous amount of recreation amenities the community offers to its residents. The kids and the “kids at heart” can beat the Florida heat in the resort style pool featuring a beach entry, fountains and a two-story slide. For more active residents, they can enjoy the basketball courts, lighted tennis courts, multi-purpose play field and a unique full size roller hockey rink. Children can enjoy activities in the tot lot. Whatever a family’s interests, St. Johns Forest is ready to accommodate.

“St. Johns Forest is a charming community that offers a quaint small town setting tucked away in beautifully preserved woodlands. The resort style amenities and diverse programs define the active lifestyle and build the sense of community belonging enjoyed by the residents”, said Jennifer Jacobs, Director of Programming, WTS International.
